Rediscover myself

Resurfacing Perfected FULL FIELD & FRACTIONAL

Polish your skin with the complete corrective suite of laser skin treatments

What comes to mind when you imagine looking and feeling your best?

For many, it's youthful looking, healthy skin. Skin that reflects how young we feel on the inside—no matter our age.

It's possible to achieve that vibrant glow with Sciton's family of laser treatments—the complete corrective skin suite, for all skin types.

POLISH YOUR SKIN WITH NANOLASERPEEL™ AND MICROLASERPEEL®

PIGMENTATION

TONE & TEXTURE

FINE LINES & WRINKLES

NanoLaserPeel is the more precise, powerful alternative to a chemical peel. The treatment brightens the complexion, evens skin tone, and reveals a beautiful glow in as little as 10 minutes.

MicroLaserPeel eliminates imperfections on the skin's surface, like rough texture, large pores, acne, and pigment, for healthier, more youthful-looking skin. Patients often say their skin went from tired to vibrant with this revitalizing treatment.

TRANSFORM AND POLISH WITH PROFRACTIONAL THERAPY™

SCAR

TONE & TEXTURE

FINE LINES & WRINKLES

ProFractional only treats a portion of the skin at a time, resulting in a healing response in the epithelial or outer layer of the skin for a dramatic reduction in texture, fine lines, deep wrinkles, and the appearance of scars.

TRANSFORMATIVE TREATMENT WITH CONTOUR TRL™

SCAR

PIGMENTATION

DEEP WRINKLES

No other non-surgical technology can turn back time as effectively as Contour TRL. This empowering treatment can be tailored according to each patient's desired outcome and expectations for downtime. Contour TRL erases fine lines and deep wrinkles, including those pesky lines around the lips and eyes.

FAQs

Laser skin treatments address skin concerns anywhere on the body, including the face, neck, chest, and hands.

To help you prepare for a comfortable experience, the provider will cleanse the skin and apply a topical anesthetic for mild treatments, or a local anesthetic for deeper treatments. You will be asked to wear protective eye shields.

During treatment, the provider will place the handpiece above the skin to deliver laser energy using a computer-guided scanner. Tunable features like adjustable spot sizes ensure a safe and comfortable patient experience.

Immediately following treatment, you may experience redness and swelling similar to a sunburn, which will, in part, be determined by your treatment intensity. Wear sunscreen daily to protect and maintain your results after your initial recovery period.

Treatments are quick, typically in 15- 30 minutes.

Visible improvements to your skin's tone and texture may be seen in as little as 1-week post-treatment. With deeper treatments, you will continue to experience improvement over time.
